5. Upgrading your computer (Yourself)

6. Research

QUESTIONS THAT MIGHT BE SURELY ASKED.

Will you teach me to hack?

Everything you need to know is mentioned above.

How old do you have to be to hack?

There is no age requirement for someone to become a hacker. It often comes down to that individual's drive and overall knowledge of computers, networking, and programming.

How will I know when I am a hacker?

If you are doing or have already done all of the above, you are considered a hacker. If you are hacking for good you are considered a **white hat hacker** if you are doing anything malicious you are considered **a black hat hacker.**

How do I know if someone else is a hacker?

Anyone who is good with computer, programming, and networking may be considered a hacker. However, trying to determine if a malicious hacker hacked into your computer is difficult, since it usually requires a hacker or computer expert to detect malicious activity.
